Hi,

After years designing spaces in architecture, I now build software — the same drive to turn a real need into something functional, now expressed in code.

I volunteer as a developer for Projeto Integrar, a community education initiative that expands access to and retention in public university for students from underserved communities.

My current focus is Full Stack and front-end web development, and I'm looking for an opportunity to contribute and grow within a team.

Lorena Piacente

Education

Systems Analysis and Development
UDESC (Santa Catarina State University) | 2023 - 2026

Architecture
Estácio University | 2017 - 2022

Languages

Portuguese (Native)
English (Advanced)
Spanish (Basic)
Mandarin (Beginner)

Extras

Design
Photoshop · Illustrator

Fundamentals
Data Structures · OOP · Design Patterns · Networking

Experience

Integrar Project (Full Stack Developer · Volunteer) — May 2025 - Present

Implementing the academic management module, focused on class and course management, along with the continuous evolution and delivery of features built in earlier stages. Improved the student module, expanding management features and integration between the system's modules. Working on the development and CI/CD workflow, using GitHub, pull requests and Vercel to automate integration and release of new versions.

Stack: Python, Django, PostgreSQL, HTMX, Alpine.js, Tailwind CSS, GitHub, Vercel

LP Soluções (Front-end Developer · Freelance) — Nov 2024 - Apr 2026

Built web interfaces and components for B2B clients, implementing front-end solutions and collaborating across different projects and professionals.

Stack: HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, React, Next.js

Aprova System (Full Stack Developer) — Aug 2023 - Jul 2026

Led requirements gathering and business process modeling (BPMN) within a cross-functional team of 5, defining workflows and business rules to guide development. Prototyped the interface in Figma for early validation and implemented the back-end and relational database architecture.

Stack: Django, PostgreSQL, Figma, HTML, CSS, JavaScript

Architect & Landscape Designer (Self-employed) — Jan 2018 - Nov 2024

Managed the full lifecycle of residential and commercial projects, from requirements gathering to delivery, handling technical decisions, documentation, deadlines, and client relationships.

Tech Stack

Back-end: Python · Django · Pytest · Node.js · Java

Front-end: HTML5 · CSS3 · JavaScript · TypeScript · React · Next.js

Database: PostgreSQL · SQL Server

Styling: Tailwind CSS · Bootstrap · Sass

Tools: Git · GitHub · Docker · Figma · Vercel · Supabase · Neon

Soft Skills

Systems Thinking
Able to understand projects end-to-end, connecting requirements, processes, people, and decisions to build consistent solutions.

Communication
Clear, strategic communication with diverse stakeholders, translating complex needs into requirements, alignment, and objective decisions.

Collaboration
Works closely with cross-functional teams, clients, and partners, fostering aligned expectations and shared accountability.

Problem Solving
Self-driven in analyzing complex scenarios, anticipating risks, and adapting strategies to find effective solutions.
